NAVRAJ

BACKEND ENGINEER | GO, TYPESCRIPT AND AWS

+91 7696078183 | asyncnavi@gmail.com | github.com/asyncnavi | navraj.site

Founding engineer building production backends for event bookings, payments and wallets, with experience in PostgreSQL transaction design, AWS serverless services and large-scale campaign delivery.

TECHNICAL SKILLS

Languages: Go, TypeScript, JavaScript, Python, Elixir, SQL
Backend: Node.js, Express, Gin, GORM, Phoenix, REST APIs, GraphQL
Data: PostgreSQL, DynamoDB, MongoDB, Redis
Infrastructure: AWS (Lambda, EC2, S3, API Gateway, CloudWatch), Docker, Jenkins, GitHub Actions, Linux

EXPERIENCE

Marzi by Primus | Founding Engineer Feb 2026 - Present
Bengaluru, India

- Built and launched a Go/PostgreSQL wallet ledger with immutable double-entry accounting and grant-backed reserve, capture and release operations for event bookings.
- Implemented per-wallet row locking, scoped idempotency and request fingerprint checks to prevent overspending and duplicate debits during concurrent requests and retries.
- Engineered event-booking and payment flows with seat reservations, Razorpay capture and amount verification, and durable settlement and reconciliation between Lambda services and the ledger.
- Generated and distributed 4M+ signed coupon codes; supported four partner campaigns reaching 50K+ users across Google Pay, PharmEasy, Pronto and Tata 1mg.
- Designed serverless services using AWS Lambda and DynamoDB, reducing infrastructure costs by over INR 30,000; migrated legacy Python services to Node.js.
- Secured ledger APIs with HMAC signatures, scoped service identities, nonce replay protection and rate limiting; implemented versioned migrations and isolated PostgreSQL integration tests.
- Built a three-person founding engineering team, owning technical hiring, engineering standards and backend delivery.

Coacheasy | Founder and Engineer Nov 2025 - Jan 2026
India

- Built a fitness-coaching SaaS MVP in Elixir and Phoenix, delivering core features for client nutrition, workouts, scheduling and engagement.

Vision11 (Haanaa) | Software Development Engineer Jun 2025 - Oct 2025
Gurugram, India

- Migrated 3.5M+ user profiles from PostgreSQL to CleverTap for customer engagement and analytics.
- Refactored two of nine microservices to improve maintainability; built a fault-tolerant production KYC integration with the Easebuzz API.

Burpy AI | Software Development Engineer Dec 2024 - May 2025
Remote

- Developed two Python/GraphQL services backed by MongoDB; wrote Go and Python scripts for database query optimization and schema maintenance.
- Implemented eight user-activity trackers for smartwatch and access-device analytics.

STAN | Freelance Developer Dec 2024 - Apr 2025
Remote

- Integrated REST APIs into a React/Next.js commerce application and packaged it for iOS and Android using React Native WebView.

EDUCATION

Chandigarh University | Bachelor of Computer Applications 2022 - 2025
Mohali, Punjab | CGPA: 7.48
